14 Chrome Extensions Developers Should Know

A practical bookmark guide for web development, debugging, design inspection, and productivity.

DESIGN & CSS
Inspect fonts, styles, and page elements.

TEST & DEBUG
Check links, dimensions, and page quality.

WEBSITE ANALYSIS
Discover technologies behind websites.

PRODUCTIVITY
Capture guides, highlight research, and customize browsing.

How to use this guide

Choose extensions based on the task you need. Open the Chrome Web Store listing and review the latest permissions, privacy policy, publisher, and reviews before installing. Features and availability can change over time.

Quick index

1. WhatFont	Identify fonts used on a webpage.
2. Window Resizer	Preview websites at different window sizes for responsive checks.
3. Check My Links	Scan a webpage to help find broken links.
4. CSSViewer	Inspect CSS properties for page elements.
5. Page Ruler	Measure dimensions and distances between webpage elements.
6. Wappalyzer	Identify website technologies such as frameworks and analytics tools.
7. Clear Cache	Clear selected browser cache data when troubleshooting.
8. Lighthouse	Audit pages for performance, accessibility, SEO, and related quality checks.
9. Scribe	Capture workflows and turn them into step-by-step guides.
10. Weava Highlighter	Highlight and organize web content and PDF research.
11. Momentum	Customize the new-tab page with a personalized dashboard.
12. Dark Reader	Apply dark themes to many websites.
13. GoFullPage	Capture a full-page screenshot of a webpage.
14. CSS Peeper	Inspect website styles and explore visual design details.

The Extension List

Each entry includes a short use case and a clickable Chrome Web Store link.

Apply dark themes to many websites.

https://chromewebstore.google.com/detail/dark-reader/eimadpbcbfnmbkopoojfekhnkhdbieeh

13. GoFullPage

Capture a full-page screenshot of a webpage.

https://chromewebstore.google.com/detail/full-page-screen-capture/fdpohaocaechififmbbbbbknoalclacl

14. CSS Peeper

Inspect website styles and explore visual design details.

https://chromewebstore.google.com/detail/css-peeper/mbnbehikldjhnfehhnaidhjhoofhpehk

Build a smarter browser workflow

You don’t need every extension. Start with the ones that solve a real problem in your daily workflow.

For frontend work	Try WhatFont, CSSViewer, CSS Peeper, Window Resizer, and Page Ruler.
For debugging	Try Check My Links, Lighthouse, and Clear Cache when relevant.
For research and documentation	Try Weava Highlighter and Scribe.
For browsing comfort	Try Dark Reader and Momentum.
For technology discovery	Try Wappalyzer to investigate a website’s technology stack.
